2018 Community Benefit Report

St. Vincent  St. Mary's  St. Nicholas  St. Clare
Since founded by our Hospital Sisters, our HSHS hospitals have reached out to address unmet health needs in the communities we serve. Today, our efforts are focused on needs revealed through Community Health Needs Assessments.

Community Health Needs Assessment

As part of the Affordable Care Act (ACA), charitable (not-profit) hospitals such as ours, are required to conduct a Community Health Needs Assessment (CHNA) every three years and adopt an implementation plan by an authorized body of the hospital in the same taxable year. In addition to developing an implementation plan, the report must be distributed and widely available to the public.

The partners in the CHNA in our Green Bay and Sheboygan communities include all area hospitals, social service agencies, representatives from the County Health Department, Community volunteers, United Way, State of Wisconsin, University and technical Colleges, Prevea Health and many more. The CHNA collaborative in Oconto Falls is comprised of representatives from HSHS St. Clare Memorial Hospital, public health, Bellin Health and many local leaders.

Each CHNA considered:

• The estimated feasibility and effectiveness of possible interventions by which to affect these health priorities.
• The burden, scope, severity and urgency of the health need; the health disparities associated with the health need.
• The importance the community places on addressing the health need.
• Other community assets and resources that could be leveraged through strategic collaboration in the hospital’s service area to address the health need.

As a result of the current CHNAs, our hospital priorities by community are as follows. Some of our 2017 activities are reflected in the following pages.

Families receive dental care thanks to the support of HSHS-Eastern Wisconsin Division

When you meet six-year-old Viviana, she seems like many other shy six-year-olds. But looking at her now, you wouldn’t know the struggles she endured just four years ago.

When Viviana was two-years-old, while living in Honduras, she suffered from seizures. The medication she was prescribed caused a high level of bacteria in her mouth, and mixed with poor dental hygiene, Viviana developed severe dental problems.

Viviana, already shy, struggled socially as she developed decay and visible cavities on her teeth. Thanks to a new pilot program in Brown County, that all changed. Through the program, Viviana’s mother, Mirsa, says her daughter was able to see a specialist at HSHS St. Mary’s Hospital Medical Center in Green Bay.

Viviana underwent a full mouth restoration, while under anesthesia.

The pilot program, which is in its first year, is operated by the Oral Health Partnership, in conjunction with HSHS-Eastern Wisconsin Division (HSWS-EWD). The system agreed to open its doors for children who require dental procedures, free of charge to families.

The program works to make sure children, who don’t qualify for emergency Medicaid or other assistance, still get needed dental work. It’s supported by hospital staff at HSHS St. Vincent Hospital and HSHS St. Mary’s Hospital Medical Center.

Viviana’s mother, Mirsa, says they are grateful for the help.

“Viviana didn’t like to look at her teeth because they had cavities she could see. But now she likes to look at her teeth and shows them off to her friends,” said Mirsa.

The program also comes with additional benefits. In the first several months, many families who’ve inquired about the pilot have been eligible to receive emergency Medicaid assistance or other coverage, they just didn’t know it. Program advisors were able to help connect those families with the additional resources.

In 2018, HSHS-EWD is expected to provide up to $25,000 and other administrative support for the program.

HSHS St. Nicholas Hospital financially supports Mindful Classroom Initiative

For more than 50 years, through advocacy, education and information, Mental Health America in Sheboygan County has worked to raise awareness and cut the stigma surrounding mental health. It’s a cause HSHS St. Nicholas Hospital is proud to support.

One of the programs used in schools is called Mindful Classroom, which utilizes an evidence-based curriculum to train teachers and students to create calmer classrooms.

During the 10-week program, students learn:

• Focus and attention, by noticing their surroundings and cutting distractions.

• Self-awareness and self-regulation using the five senses, learning to be present and pause to make more thoughtful choices.

• To be aware of thoughts and emotions.

• Kindness, generosity, gratitude and compassion in order to build social skills and relationships.

HSWS St. Nicholas Hospital provides contributions to the program, which allows more students and teachers in Sheboygan County to participate. During the 2017-2018 school year, 66 classrooms participated with a total of 1,200 students. Based on surveys, 76 percent of students reported better focus in the classroom and 88 percent of educators reported calmer classrooms.

“With youth facing increased stress and trauma, numbers like these show we are working upstream and making a difference,” said Kate Baer, Executive Director of Mental Health America in Sheboygan County.

The Mindful Classroom program was originally developed by Growing Minds, which is a non-profit based in Milwaukee.
Mixing education and action to end food insecurity in Oconto County

HSHS St. Clare Memorial Hospital in Oconto Falls is working to address food insecurities and educate community members on the importance of donating healthy food to local pantries. Food insecurity is defined as the lack of access to enough food for an active, healthy lifestyle.

“Access is an issue for many residents of Oconto County, especially in the northwestern part of the county,” said Nuala Nowicki, Prevea Health school nurse and committee member, Oconto County Nutrition and Physical Activity Workgroup. “No one should have to worry about where their next meal is going to come from, which is why I feel this is such an important area of focus.”

The goal of the Nutrition and Physical Activity Workgroup, which works in partnership with HSHS St. Clare Memorial Hospital and Prevea Health, is to increase the amount of healthy food options available to the community. The group created a ‘donate a healthy plate toolkit,’ which is meant to help food pantry donors, pantry staff and food drive organizers promote healthy food donations. Since the toolkit’s launch in August 2017, the group has continued to provide updated materials and education.

“While our committee still has a lot of work to do, the toolkit has proven to be a great resource for organizations that host food drives,” said Nuala. “For example, I brought the toolkit to the 5th graders at Gillett Elementary School for their annual food drive last year. Some teachers and students admitted they never thought of monitoring their donations for expiration dates, and never thought to encourage donors to give healthy food options – most figure food is food, anything’s better than nothing.”

The group also established nine permanent food pantry collection sites throughout Oconto County, including all Prevea health centers in the county. By increasing collection sites and improving the nutritional value of the food collected, the group hopes to decrease the number of families experiencing food insecurity.

### Donate a Healthy Plate

**Fruits**
- Canned fruit, in 100% juice or water
- Unsweetened applesauce
- 100% fruit juice
- Dried fruit, no sugar added

**Grains**
- Whole grain cereals with low sugar
- Oatmeal
- Barley
- Brown or wild rice
- Quinoa
- Whole wheat pasta
- Corn or whole wheat tortillas
- Whole grain crackers
- Whole grain granola bars

**Protein**
- Canned chicken, salmon and tuna, packed in water
- Canned beans, low sodium
- Dried beans or peas
- Peanut Butter
- Nuts and seeds, unsalted

**Vegetables**
- Canned vegetables, low or no sodium
- 100% vegetable juice
- Canned tomatoes

**Other Items**
- Tomato/Spaghetti sauce, low sodium
- Canned soups & broth, low sodium
- Vegetable or olive oil
- Spices
- Flour

Above: The Donate a Healthy Plate campaign encourages community groups to collect healthy items during food drives, so pantries can stock their shelves with items they may not have access to otherwise.

Perking up the Pickleball Court

Pickleball isn’t just becoming a popular pastime in Oconto Falls, the sport also provides a way to improve people’s health. To keep the momentum going, HSHS St. Clare Memorial Hospital is contributing to a community effort to improve the local Pickleball courts.

Pickleball resembles tennis and is played Tuesday, Wednesday and Thursday mornings, as well as Sunday afternoons at Pleasantview Park.

The community raised more than $16,000 to resurface, seal and paint lines at the park’s three pickleball courts, which share space with a basketball court. HSHS St. Clare Memorial Hospital was among the organizations that contributed funds for the project. The hospital also paid for an equipment box, which was built by Oconto Falls High School metalwork students.

The sport attracts players of all ages and skill levels.

“It’s a good workout that’s enjoyable to do,” said pickleball player, Doug.

Doug says it’s not only fun and sociable, but he says he also noticed a change in his overall health and wellness.

“It has improved my hand/eye coordination and my flexibility,” said Doug.

He also saw an improvement in his blood pressure and cholesterol levels. Doug’s results are something community leaders hope to see in others.

In the 2017 Oconto County Community Health Needs Assessment, creating more opportunities for recreation and exercise was identified as a growth opportunity. According to the report, 25 percent of adults over the age of 20 in Oconto County reported no leisure time physical activity, compared 20 percent statewide. In that same report, 49 percent of people reported having adequate access to exercise opportunities, compared with 81 percent statewide.

Community Benefit Spending

Charity Care at Cost
- Free or discounted health services provided to persons who cannot afford to pay
- Care provided to uninsured, low-income patients who were not expected to pay all or part of a bill

Unpaid Cost of Medicaid, Medicare Shortfall, and Means Tested
Unpaid costs of public programs, the “shortfall” created when a facility receives payments that are less than costs for caring for public program beneficiaries.

Community Health Service (under charity care)
Clinical services provided to the community such as free clinics, screenings, or one-time events.

Subsidized Health Services
Clinical patient care services that are provided despite a negative margin because they are needed in the community and other providers are unwilling to provide the services, or the services would otherwise not be available to meet patient demand.

Financial Contributions
Funds and in-kind services donated to individuals and/or the community at large. Includes overhead expenses of space donated and donations of food, equipment, and supplies.

Community Health Services (under Other Benefits)
Activities carried out to improve community health. This includes lectures, presentations, support groups, and other activities provided to groups/individuals without providing clinical or diagnosis services.

Health Professions Education
Internships, residencies, or other clinical settings provided to students for vocational learning.

Community Building Activities
Cash, in-kind donations, and budgeted expenditures used for the development of community health programs and partnerships. This includes housing, economic development, environmental improvements, and coalition building.

Community Benefit Operations
Costs associated with dedicated staff, community health needs assessment, and other costs associated with community benefit strategy and operations.
Provides free aids and services to people with disabilities to communicate effectively with us, such as:

- Qualified sign language interpreters
- Written information in other formats (large print, audio, accessible electronic formats, other formats)

Provides free language services to people whose primary language is not English, such as:

- Qualified interpreters
- Information written in other languages
- Written information in other formats (large print, audio, accessible electronic formats, other formats)

If you need these services, contact 1-217-464-7600 (TTY via Illinois Relay 800-526-0844).

If you believe that HSHS St. Vincent Hospital, HSHS St. Mary’s Hospital Medical Center, HSHS St. Nicholas Hospital and HSHS St. Clare Memorial Hospital has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can file a grievance with:

System Responsibility Officer and 1557 Coordinator
4936 Laverna Road
Springfield, Illinois 62794
Telephone: (217) 492-6590, FAC: (217) 523-0542

You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the System Responsibility Officer and 1557 Coordinator is available to help you. You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights, electronically through the Office for Civil Rights Complaint Portal, available at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf, or by mail or phone at:
